MEMORANDUM FOR: TSSG Suggestion Awards Panel Member [REDACTED]
SUBJECT : Suggestion 69-277/N-129-9

25X1

I believe the IEG speed letter regarding the subject, dated 12 May 1970, might be misinterpreted in its description of the relationship of the RED contract to the subject Beneficial Suggestion. To the best of my knowledge, RED has never negotiated a contract for the development of adapter collars for [REDACTED] 15X Filar Eyepieces to be used with the Zoom 240 Microstereoscope. We do have a contract with [REDACTED] for the development of a specific filar eyepiece to be used with the Zoom 240 as was recommended by [REDACTED]. The contract has had to be renegotiated because of the change from the Advanced Stereo Rhomboid Mod II to the [REDACTED] Stereo Rhomboid which requires image rotation elements just below the eyepieces. Due to the presence of these image rotation elements, the filar eyepiece specified in the original contract must be modified, which is the basis for the contract renegotiation.
